KELLY'S TRUE-TO-NAME FRUIT TREES FOR FALL PLANTING

William F. Kelly
President

James B. Carmody
Vice-President

John W. Kelly
Secretary and Treasurer

Our 60 years experience in the nursery business has proven to us that Fall is a practical and desirable time to plant fruit trees, especially Apples, Pears, Plums, Sweet and Sour Cherries, and other kinds of nursery stock.

PLANT THIS FALL

Fall planted trees make some new root growth before Winter sets in and the earth becomes firmly packed about the roots during the Winter months. As a result of this, they make an early, vigorous start the following Spring, which is so essential for best results. The Fall planting season begins just as soon as the trees and bushes reach a dormant condition, which is usually about the middle of October, and extends until the ground freezes solid.

VISIT OUR NURSERIES

We invite you to come to our Nursery and pick out your own trees. Many of our customers do this and find it very satisfactory to select just the variety and type of tree that best meet their needs. You are always welcome at our Nursery.

We have had an unusually fine growing season, and thus are able to offer you exceptionally healthy, vigorous stock at these special prices. You will never regret planting Kelly's trees.

INSTRUCTIONS FOR ORDERING

ORDER EARLY—As soon as this Catalog reaches you send in your complete order with definite shipping instructions. Your order will be shipped as soon as possible after October 15th when nursery stock is fully matured.

USE ORDER SHEET—Please make your order out on order sheet enclosed. To avoid mistakes and delay write letters on a separate sheet of paper.

SEND CASH WITH ORDER—It is our cash with order—direct from nursery to planter—method of doing business that enables us to sell trees of the highest quality at such extremely low prices. Remittances should be made by post office or express money order, bank draft or registered letter.

BOXING AND PACKING FREE—We make no charge for boxing or packing. Prices are f. o. b. cars at Dansville.

QUANTITY RATES—Take advantage of our lower rates for quantity purchases. For less than ten trees of any variety remit at **each** rates. A purchase of ten to fifty trees (assorted if you wish) entitles you to the ten rates, and an order for fifty trees or more entitles you to the low hundred rates.

WE STRIVE TO AVOID MISTAKES

But in the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthness to name, to replace the original order or to refund the purchase price.

SATISFACTION GUARANTEED—We guarantee every tree or bush to be up to grade specified or better. We also guarantee arrival to customer in first class condition. If through delay or mishandling in transit, trees or bushes are not in first class condition on arrival, notify us immediately, and we will make prompt, satisfactory adjustment. Our trees are not sold by height only. We grade and sell our trees both by height and caliper as we believe this is the only way of giving entire satisfaction to the planter.

OUR REFERENCES

As to our responsibility and reliability, we refer you to the Merchants and Farmers National Bank, Dansville, N. Y.; Groveland State Bank, Groveland, N. Y.; . . . to any person whose letter appears in this catalog, or to your State Experimental Station or College.

PLANT CHERRY TREES THIS FALL!

*Recognized Authorities Agree Fall-Planted
Cherries Make Better Growth*

KELLY'S Upland-Grown, Strong Rooted CHERRIES

We are one of the largest producers of Cherry trees in the United States. Sixty years' experience—ideal soil and climatic conditions all combine to produce the finest to be had in Cherry trees. Our Cherries are all upland grown, thus assuring a healthy, vigorous root system. Cherry trees require a well drained soil.

MONTMORENCY . . .

THE LEADING SOUR CHERRY

LARGE MONTMORENCY "Best Pie Cherry"—Fruit is good-sized, fine flavored and bright, clear red. The canning factories are always calling for them and buy them by the hundreds of tons. The best of all sour varieties; is a good shipper, very attractive and always brings good prices. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of all other sour varieties. Montmorency can always be depended upon for a full crop, no matter how unfavorable the season may be. Fruit ripens ten days after Early Richmond.

SOUR VARIETIES

DYEHOUSE—Ripens a week ahead of Early Richmond. The earliest good sour cherry. Early June.

EARLY RICHMOND—Exceedingly hardy and productive. Ripens through June.

ENGLISH MORELLO—Large, blackish red cherry ripening in July. Hardy and productive.

MAY DUKE—A very early dark red cherry of good quality. Very hardy. June.

OSTHEIM—Large, dark red. Almost sweet. Hardy. Late July.

SWEET VARIETIES

BLACK TARTARIAN—Very large, bright purplish black. Juicy and rich. An immense bearer. June.

BING—Large, dark brown, of fine quality. Hardy and vigorous. July.

GOVERNOR WOOD—Large, yellow marbled with light red. Sweet and rich. Productive. June.

LAMBERT—Very large, purplish red. Firm and rich. Very productive. Late July.

NAPOLEON (Royal Ann)—Large, pale yellow with bright red cheek. July.

SCHMIDT'S BIGGAREAU—Very large, deep mahogany color. Very juicy. July.

WINDSOR—Large, very dark red, firm and rich. July.

YELLOW SPANISH—Pale yellow with bright red cheek. Productive. June.

For additional varieties and more complete descriptions, please refer to our general Spring catalog.

10%

CASH DISCOUNT IF YOU ORDER EARLY!

On all orders received by us on or before October 10, 1940, we will allow a special 10% discount. Save money . . . and help us avoid a big rush at shipping season. It's Your advantage to take the discount!

NOTE: This offer applies only to orders of \$3.00 or more, and when cash accompanies the order.

Kelly's TRUE-TO-NAME APPLE TREES

Dr. J. K. Shaw, and his associates of the Mass. Agricultural Experiment Station, a recognized authority on fruit tree varieties, have again inspected our Apple trees for Trueness-to-Name. We have on file in our office a statement issued by him that to the best of his knowledge all the salable Apple trees in Kelly Bros. Nurseries are true to name.

Trees with Certification Tags attached can be supplied at 5c additional in the following varieties: Baldwin, Cortland, Delicious, Early McIntosh, McIntosh Red, Northern Spy, Red Gravenstein, Rome Beauty, Stayman's Winesap, and Red Spy.

Summer Varieties

- EARLY HARVEST**—Large pale yellow apple of fine flavor. Good bearer. August.
- GOLDEN SWEET**—Large, pale yellow, very sweet. August.
- SWEET BOUGH**—Large, pale yellow, sweet. August.

- RED ASTRACHAN**—Handsome deep crimson apple, excellent for cooking. Hardy and a good bearer. August.
- YELLOW TRANSPARENT**—The best early yellow apple. Excellent flavor. Trees hardy and abundant bearers. August.

Early McIntosh

EARLY McINTOSH

For home orchard or commercial use this is the ideal early variety to plant. Resembles its McIntosh parent with its handsome red color and uniform round shape. The tree is a vigorous grower, hardy and productive. It is an annual bearer, and early thinning is recommended. Under favorable conditions of growth it comes into bearing at an early age. Besides pleasing the taste, this early apple pleases the eye. The flesh is white, tender, and juicy with fine flavor. Ideal dessert apple. Ripens in August.

. . . grown under the most exacting conditions to insure
healthy . . . heavy-bearing . . . disease-free trees

Autumn Varieties

FALL PIPPIN—Very large, yellow and juicy. Excellent for cooking. Hardy and productive. October to December.

FAMEUSE (Snow Apple)—Medium size, crimson with snow white flesh. Excellent quality. November.

GRAVENSTEIN—Large, handsome, red streaked apple of excellent quality. September to November.

MAIDEN'S BLUSH—Large attractive red blushed apple of fair quality. Heavy bearer. September.

MAMMOTH BLACK TWIG—Large deep red late keeping winter apple of good quality. December to May.

MILTON—A very handsome new apple of the McIntosh type. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor. Trees hardy and vigorous. Ripens a month ahead of McIntosh.

POUND SWEET (Pumpkin Sweet)—Large yellow russeted apple. Very sweet. October and November.

RED GRAVENSTEIN—A new red sport, much more attractive than its parent. Differs from the old Gravenstein only in the solid dark red color of the fruit. Should be planted in place of Gravenstein.

RED DUCHESS—Red sport of Duchess. Bears early, good size, hardy, September.

WEALTHY—Beautiful, brilliant red apple of fine quality. Exceptionally hardy and an early bearer. Excellent filler. October to January.

WOLF RIVER—Very large, yellow striped with bright crimson. September to December.

Winter Varieties

BALDWIN—Large, bright red. Trees vigorous and productive. A leading commercial sort in New York and New England. November to May.

CORTLAND—A comparatively new apple of the McIntosh type that combines the high quality and flavor of the McIntosh, the ability to stand handling of the Baldwin and ability to hang to the tree of the Ben Davis. Should be planted extensively. An excellent variety to plant with McIntosh as a cross pollinator. November to February.

DELICIOUS—A large dark red apple with crisp, fine grained flesh of excellent quality and flavor. Hardy, vigorous and an annual bearer. December to February.

DOUBLE RED DELICIOUS—A very fine colored, solid red strain of Delicious resembling its parent in all characteristics except color.

GANO (Black Ben Davis)—Large, dark red. January to June.

GALLIA BEAUTY—A new red sport identical with Rome Beauty except that fruit is solid red in color instead of striped.

GOLDEN RUSSET—Attractive yellow russeted apple. Long keeper. November to April.

GRIMES GOLDEN—Large golden yellow. Good quality. December to April.

JONATHAN—Beautiful red apple of excellent quality. Productive and an early bearer. November to April.

KENDALL—Dark red McIntosh seedling. Productive, good keeper. Ripens with McIntosh.

KING—Large attractive red apple. November to March.

WINTER VARIETIES—Continued

McINTOSH RED—A very attractive red apple of the highest quality. Hardy, bears young and annually. A leading, profitable, commercial sort for New York and New England. Productive. October.

MACOUN—Heavy, and regular bearer. Dark red, white fleshed. November.

NORTHERN SPY—Large red and yellow apple of fine quality. Leading commercial sort. November to April.

NORTHWESTERN GREENING—Large, yellowish-green apple. Vigorous and hardy. October to March.

ORLEANS—Delicious type, ripening same time as Delicious. Early annual bearer.

OPALESCENT—Very handsome dark crimson apple. December to March.

RHODE ISLAND GREENING—Large yellowish-green apple of fine quality. An abundant yielder and excellent keeper. One of the leading commercial sorts. November to March.

RED SPY—A new red sport identical with Northern Spy except that the fruit is a solid bright red. Much handsomer than its parent. An excellent commercial sort.

RAMBO—Red and yellow. Hardy and productive. October to December.

ROME BEAUTY—Yellow and red striped apple of excellent quality. Prolific annual bearer. Profitable commercial sort for New York, Ohio, Pa., and W. Va. December to May.

RED ROME—Another new red sport of Rome Beauty and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red in color.

SMOKEHOUSE—Yellow, mottled with dark red. October to March.

SPITZENBURG—High flavored, dark red. November to April.

STARK—Large, red and yellow striped. January to May.

STAYMAN'S WINESAP—Yellow striped with red. Excellent quality. Productive and an early bearer. December to March.

TOLMAN SWEET—Yellow tinged with red. Very sweet. Hardy and productive. November to April.

TWENTY OUNCE (Collomar)—Very large, red and yellow striped. October to January.

WAGENER—A bright light red apple of excellent quality. Very productive. October to January.

WINTER BANANA—Beautiful pale yellow apple with bright pinkish blush. Excellent quality. Prolific and an early bearer. November to March.

YELLOW DELICIOUS—A bright golden yellow apple of excellent quality. Splendid keeper.

YORK IMPERIAL—Yellow striped with light red. Quality very good. December to February.

R. I. Greening

CRAB APPLES

DOLGO CRAB—A handsome hardy red crab apple. Vigorous and productive. Very juicy, jellies easily, and makes a rich, ruby red jelly of beautiful color and excellent flavor. Makes exceptionally good cider. Early September.

HYSLOP—Popular because of its large size. Beautiful deep crimson color. Tree is hardy and a reliable cropper, fruiting in September.

RED SIBERIAN—An attractive large size, all red crab apple. This variety ideal for jelly.

TRANSCENDENT—Bright yellow with bright red cheek. Productive. August and September.

KELLY'S PEACHES

Heavy Yielding . . True-To-Name Trees

Fall planting of Peaches is now recommended where the winters are mild. In sections where Peaches can be planted in the Fall, trees make much better growth the first season than when planted in the Spring.

PRICES OF PEACH TREES

			Each	Ten	Hundred

VARIETIES LISTED IN ORDER OF RIPENING—IN WESTERN NEW YORK

MIKADO—Hardy, productive. Ripens about six weeks ahead of Elberta. Blossoms self-sterile, needs to be inter-planted. Early August.

GREENSBORO—Large, red over yellow, flesh white. Good quality. Freestone. Late August.

MARIGOLD—Early yellow, excellent quality, semi-cling. Late August.

ORIOLE—Fruit medium to large in size, yellow fleshed, and a freestone. Trees vigorous and productive. Early September.

GOLDEN JUBILEE—Large yellow freestone of highest quality. Tender, juicy, and sweet. Tree unusually hardy.

CUMBERLAND—Vigorous grower and as hardy as Carman. Fruit is large, attractive in color and shape. Flesh is white and almost free.

CARMAN—Large, white fleshed peach of fine quality. Very hardy and productive. Freestone. Early September.

ROCHESTER—Large yellow, with attractive red blush. A very fine canner, prolific, and an early bearer. Freestone. Early September.

VEDETTE—Fruit is large, roundish oval, yellow fleshed, and a freestone. Superior quality and color. Early September.

YELLOW ST. JOHN—Of medium size, orange yellow with a red blush on sunny side. Good quality. Strong grower and prolific. September.

VALIANT—Large, yellow, freestone, juicy, very good quality. Productive. Early September.

SOUTH HAVEN—Golden yellow with red blush. Large, meaty, and of delicious flavor. Prolific. Freestone. Early September.

HALE HAVEN—In season about ten days ahead of Elberta. Large, yellow freestone, highly blushed, very attractive, round, firm, and of good quality. Tree is vigorous and productive. A promising new variety.

ECLIPSE—Yellow freestone. Ripens about a week before Elberta and two weeks after Golden Jubilee. Fruit attractive, medium to large size, very hardy.

HILEY BELLE—Large white peach with bright red cheek. Rich and juicy. Excellent shipper. Freestone. Early September.

VETERAN—Large, round, yellow fleshed fruit. Freestone. Early September.

FITZGERALD—Very hardy. Large, brilliant yellow with red cheek. Early bearer. Freestone. Middle September.

CHAMPION—Large creamy white with red cheek. Excellent quality. Good shipper. Hardy and productive. Freestone. Middle September.

BELLE OF GEORGIA—Large, attractive white fleshed peach. Red cheek. Hardy and productive. Freestone. Middle of September.

CRAWFORD'S EARLY—Large yellow peach of the finest quality and flavor. Freestone. Middle of September.

EARLY ELBERTA—An excellent new variety resembling Elberta very closely, except a little rounder in shape and about ten days earlier in ripening. Freestone. Late September.

ELBERTA—The greatest commercial variety on the market. Will thrive where any peach can be grown. A uniform cropper. Large, yellow with red cheek, juicy and excellent quality. Freestone. Last of September.

J. H. HALE—An extra large peach, yellow overlaid with crimson. Flesh golden yellow of delicious flavor. An excellent shipper. Prolific when cross pollenized with some other variety. Freestone. Late September.

SALBERTA—Large Elberta type, late peach of good quality. Freestone. Early October.

CRAWFORD'S LATE—One of the finest late varieties. Large, yellow, of excellent quality. Freestone. Early October.

SMOCK (Beers Smock)—An old variety, prized for either home use or market. Bears heavy every year. September.

SALWAY—Large; deep yellow, red cheek. Flesh yellow, juicy. October.

KELLY'S PEAR TREES

The pear trees we are offering this year are some of the finest we have ever grown. No home orchard is complete without several pears. Being upright they require little room and are ideal for small lots. Kelly pear trees are budded on the finest seedlings available, and grown on the best upland pear soil in the country. Pears do best on a heavy well drained soil. Sod cultivation is recommended. The varieties below represent the best types for home and commercial orchards.

PRICES OF STANDARD PEAR TREES			
	Each	Ten	100
2 Year 5 to 7 ft. $\frac{3}{4}$ and up	\$.50	\$ 4.50	\$ 35.00
2 Year 4 to 5 ft. $\frac{5}{8}$ to $\frac{3}{4}$.40	3.50	25.00
2 Year 3 to 4 ft. $\frac{1}{2}$ to $\frac{5}{8}$.30	2.50	20.00
1 Year 3 to 5 ft. Sturdy Buds.....	.40	3.50	25.00

Write for Prices on Larger Quantities

ANJOU—Is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thoroughly ripe. Very juicy, luscious, and of the best quality. For late fall and very early winter use, we have no better variety. October to January.

BARTLETT—Justly the leading commercial pear—a leader among canning Pears. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky flavor. Tree is a vigorous erect grower and bears abundantly. Ripens in September.

BEURRE BOSC—Very popular variety. Very large, gourd shaped pear, brownish yellow in color. Hangs to tree well on account of its long stem, which allows it to sway in heavy winds. White flesh, rich and delicious. Tree very productive. Will keep until Christmas.

Bartlett

CAYUGA (New)—A new seedling of Seckel which it resembles in shape and color. Fruit is as large as Bartlett and of high quality.

CLAPP'S FAVORITE—Large, fine, pale lemon-yellow, with brown dots; fine texture, melting, buttery, juicy, with a rich, sweet delicate, vinous flavor. Tree hardy and very productive. Thrives where other varieties fail.

DUCHESS D'ANGOULEME—A most dependable cropper, often fruiting the first season after planting. Fruit large. A dull greenish yellow, spotted russet, flesh white, rich and good quality. October to November.

FLEMISH BEAUTY—This fine old pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. September and October.

GORHAM (New)—Resembles Bartlett in size, color, and shape. The flavor is sweet and vinous with a very marked and pleasing aroma. Trees vigorous and productive. Fruit ripens two weeks after Bartlett.

KIEFFER—Large to very large. Skin yellow with light vermilion cheek. Flesh very juicy, with a marked musky aroma. Good quality.

LAWRENCE—Trees healthy, hardy, and very productive. Fruit large; skin yellow, covered with brown spots. Flesh whitish, rich, and aromatic.

SECKEL—A delicious little pear that is the standard of excellence in its class. One of the richest and highest flavored pears known. Yellowish-brown with red cheek. Very productive. August to October.

SHELDON—Large, round, russet, and red pear. Very rich and delicious. October.

VERMONT BEAUTY—Medium, yellow shaded with carmine. Good cropper. October.

WILLARD (New)—One of the best winter pears. Recommended for its high quality and lateness. Has shape and color of Bartlett. Flesh is yellowish, fine grained, tender and juicy.

WORDEN SECKEL—Fruit larger than Seckel. Shaped like Bartlett, but not as large. Yellowish-brown with red cheek. Excellent quality. October.

KELLY'S PLUMS

Fellemburg Plum
½ Actual Size, 1

No other fruit tree, unless it is the cherry, produces more abundantly than a plum tree. Although they will yield crop after crop despite neglect, plum trees will readily show the result of care and modern methods of fruit growing. The commercial side of plum production has received much attention in late years, but the supply still falls short of the demand. In general, plum trees thrive best in a sandy or clayey soil. We can recommend to the planter the following varieties:

PRICES OF PLUM AND PRUNE TREES

	Each	Ten	100
2 Year 5 to 7 ft. ¾ and up	\$.60	\$5.00	\$35.00
2 Year 4 to 5 ft. ⅝ to ¾	.55	4.50	30.00
2 Year 3 to 4 ft. ½ to ⅝	.50	4.00	25.00
1 Year 3 to 5 ft. Sturdy Buds	.55	4.50	30.00

Write for Prices on Larger Quantities

JAPANESE VARIETIES

ABUNDANCE—Fruit large, very early; amber turning to a rich, bright cherry. Flesh light yellow, exceedingly juicy and tender. Freestone. Excellent for canning.

BURBANK—Fruit is very large, bright reddish purple. Meaty and quite firm. Excellent shipper. Tree hardy, vigorous, and productive. Needs close pruning.

RED JUNE—Ripens before Abundance. Medium to large; deep vermilion-red; flesh light lemon-yellow; fine quality. Vigorous, hardy; productive.

SATSUMA—Large, globular, with sharp point, purple and red with bloom. Firm, juicy, dark red, fine quality flesh.

WICKSON—Sturdy, upright grower. Fruit handsome, deep, maroon-red. Flesh fine texture, firm, sugary, and delicious. Excellent shipper.

EUROPEAN VARIETIES

BRADSHAW—Very large, fine early plum, dark violet red, juicy and good. Very productive; valuable for market. Quality is excellent, color attractive. Good canner.

GRAND DUKE—One of the best late plums for market. Large as Bradshaw, same color, entirely free from rot. Late September.

IMPERIAL GAGE—Rather large; oval, greenish; flesh juicy, rich and delicious. Vigorous grower; very productive.

LOMBARD—Medium to large, roundish, dark red. Flesh yellow, juicy. Hardy; prolific bearer. Valuable commercial sort. August.

MONARCH—Very large, bluish-purple. Juicy, golden green flesh. Bears early and abundantly. Excellent for market. September.

REINE CLAUDE (Bavay's Green Gage)—Large, pale yellow, marked with red; good bearer. Middle of September.

SHIPPER'S PRIDE—Large, dark purple. Juicy and sweet, excellent for canning. September.

SHROPSHIRE DAMSON—Medium size dark purple fruit produced in thick clusters. Excellent canner. Tree a good grower and very productive. October.

YELLOW EGG—Golden yellow covered with thick bloom. Tree large, very productive. September.

PRUNE TREES

FELLEMBURG PRUNE—Large, pointed and tapering. Dark purple. Juicy and delicious. Early September. Freestone.

GERMAN PRUNE—Fruit long, oval, purple with thick bloom. Flesh firm, sweet, and delicious. Excellent commercial sort. September. Freestone.

YORK STATE PRUNE—One of the largest and best. Dark blue, with purple bloom. Delicious. Last week in September. Freestone.

STANLEY PRUNE—Introduced by the N. Y. State Experimental Station, and is becoming a valuable commercial variety. Large dark blue with thick bloom. Flesh greenish yellow, juicy, and sweet. Bears annually. Midseason.

NEW DWARF FRUIT TREES

Dwarf Apple Trees

BUDED ON NEW MALLING ROOTSTOCK

Our Dwarf Apple Trees are budded on the New Malling dwarf rootstock introduced recently to this country by Dr. H. B. Tukey of the New York State Experiment Station.

Now you can have several varieties growing in your yard because of the small space required. 15 x 15 is a recommended spacing.

For those who enjoy working with plants, there is a source of much pleasure in dwarf fruit culture, watching the fruit take shape and ripen over the season.

PRICES ON DWARF APPLE TREES

	Each	Ten
Large 1 Year 2½ to 3 ft.	\$1.25	\$10.00
VARIETIES—Baldwin, Cortland, McIntosh, Northern Spy.		

	Each	Ten
Large 2 Year 3 to 4 ft.	\$2.00	\$17.50
VARIETIES—Early McIntosh, Red Spy, McIntosh.		

Note—Our supply of these trees is limited, so we suggest you order early.

Dwarf Pear Trees

REQUIRE LITTLE ROOM—FRUIT EASILY PICKED—BEAR YOUNG

Although Dwarf Pear Trees have proven very profitable in commercial orchards, they are best adapted to the garden or home orchard where the space is limited, as they can be planted very close together and require little room.

The fruit is very easy to pick as the trees are low headed, and it is not necessary to wait long for returns as they come into bearing very early, usually the second or third year after planting. Pears are dwarfed by budding on Quince Stock and the trees should be planted three inches below the union.

VARIETIES THAT GROW BEST AS DWARFS

All varieties of Pears do not give good results as Dwarfs. We recommend the following varieties to be good growers and bearers and to give the best satisfaction as Dwarfs:

**Bartlett
Duchess**

**Clapp's Favorite
Seckel**

For complete description of above varieties kindly turn to Page 8.

PRICES OF DWARF PEAR TREES

	Each	Ten
2 Year 4 to 5 ft. 5/8 and up	\$.65	\$5.00
2 Year 3 to 4 ft. 1/2 to 5/860	4.00

QUINCE TREES supply an abundance of fruit for tasty preserves and jellies.

Its pre-eminence as a fruit for jellies and preserves makes the quince a profitable tree for the fruit grower, the farmer or any one having even a small garden. The quince tree does not take much room on account of its dwarfish character. Any kind of good, rich soil will give good results. It can be grown in bush or tree form. Hardly any family's fruit supply for the winter is complete without the quince. We recommend the following varieties:

ORANGE—Popular, extensively cultivated, reliable, and satisfactory. Roundish, bright golden yellow, very large, fine grained, fine quality. Best for cooking.

WAYNE COUNTY ORANGE—A superior new variety introduced largely through our efforts. Extra large, golden yellow, of excellent quality. Regular cropper. Ripens early September.

PRICES OF QUINCE TREES

	Each	Ten	Hundred
2 Year 4 to 5 ft.			
5/8 and up	\$.60	\$5.00	\$40.00
2 Year 3 to 4 ft.			
1/2 to 5/850	4.00	30.00

KELLY'S DEPENDABLE GRAPES . . .

STURDY VINES, BEARING HEAVILY EACH SEASON

PRICES ON STRONG 2 YR. NO. 1 VINES
CONCORD—15 cents each, \$1.00 per 10, \$7.50 per 100.

ALL OTHER VARIETIES (Except as Noted)
—20 cents each, \$1.50 per 10, \$12.00 per 100.

AGAWAM (Red)—A large red grape with rich aromatic flavor. A strong grower and very productive. Midseason.

CACO (Red)—A new wine red grape which is proving to be a great favorite. Berries very large and sweet. Early September. **25 cents each, \$2.00 per 10, \$15.00 per 100.**

CATAWBA (Red)—Dark red. Bunches large, berries medium. Best for table and wine. Late.

CONCORD (Black)—The leading commercial grape. Color blue-black. Bunches and berries large. Hardy, productive, and an excellent shipper. Succeeds over large area. Excellent for grape juice. Midseason.

DELAWARE (Red)—Bunches and berries small. Light red, unusually sweet and delicious. Early.

FREDONIA (Black)—Recent introduction of N. Y. State Experimental Station. Medium cluster, berries large. Ripens two weeks ahead of Worden. Highly recommended.

GOLDEN MUSCAT—Wonderful new golden yellow grape. Berries large, juicy, and aromatic. Ripens after Concord. **50 cents each, \$4.50 per 10.**

NIAGARA (White)—The most popular white grape. Bunches and berries extra large. Vigorous, productive, and a good keeper. Midseason.

PORTLAND (White)—Earliest white grape. Vigorous, hardy, and very productive. Berries large and sweet.

SHERIDAN (Black)—An improved Concord, with firmer, sweeter berries. Large and more compact. About a week later. **25 cents each, \$2.00 per 10, \$15.00 per 100.**

WESTFIELD (Black)—New, resembling Concord, ripening just before it. Berries are medium and firm. Juice is exceptionally highly colored.

WORDEN (Black)—A large early black grape of fine quality. Berries and bunches large.

RASPBERRIES

PRICES (Except as Noted)

\$1.00 per 25, \$2.50 per 100, \$20.00 per 1000

CUMBERLAND (Black)—Large, glossy black, firm, of excellent quality. Hardy and productive. Early to Midseason.

COLUMBIAN (Purple)—A fine commercial sort. Vigorous, very productive, excellent canner. Fruit large, purple, firm. Midseason.

INDIAN SUMMER—New Everbearing Red Raspberry. Berries large, conical, much superior in quality and size to any of this type. **\$1.50 per 25, \$4.50 per 100.**

LATHAM (Red)—Large, round, firm, brilliant red. Most profitable commercial variety. Hardy, very prolific, an excellent shipper and a perfect variety for canning. Early. Ripens evenly over a very long season.

MARCY (Red)—First introduced in 1936 this variety is fast gaining in prominence. Desirable for market and home use. Good quality, vigorous, productive. **\$1.50 per 25, \$4.50 per 100.**

NEWBURG (Red)—A new variety of excellent color and quality. Very large and firm. Fine keeper and shipper. Vigorous, hardy, and very productive. Three or four days earlier than Cuthbert.

ST. REGIS (Everbearing)—A bright crimson berry of excellent quality. Fruit commences to ripen with the earliest and continues to ripen on young canes until October.

SODUS—New Purple Raspberry from New York Experimental Station. Fruit is large, firm, medium purple color, and does not crumble. Plants hardy and very productive. **\$1.25 per 25, \$4.00 per 100.**

TAYLOR—A new Red Raspberry introduced by the New York State Experimental Station. Plants are vigorous, hardy, and productive. Long, conical shape, firm, thick flesh. Excellent quality, ripens just before Latham.

BLACKBERRIES

Blackberries thrive best on fertile loam. The rows should be about six feet apart, with each plant approximately two feet apart in the row.

PRICES

\$1.00 per 25, \$3.00 per 100, \$22.50 per 1000

BLOWERS—An upright mammoth grower. Very hardy and productive. Fruit very long, finest flavor and jet black. Fruits continuously July to September.

ELDORADO—The hardiest and sweetest blackberry. Berries are large, jet black, borne in large clusters, very sweet, and practically coreless.

GIANT BOYSENBERRIES ... Hardy, Heavy Bearing Sweet

The amazing new berry, a cross of the Blackberry, Raspberry, and Loganberry, and is far more vigorous than any of its parents. It is immense in size and when you taste it, you will agree that in flavor it stands supreme. The fruit when fully ripened will literally melt in your mouth. A distinctly different, very pleasant flavor, no core and very few seeds, make it a most delicious berry for eating fresh, for pies or

for canning. If you want a real treat, here it is. It makes considerable horizontal growth as compared to its height. For easy picking, plants should be trained on a fence or wires. Plants are strong, vigorous, and quite hardy. However, we advise covering with straw or hay in Winter in cold climates to avoid Winter injury.

PRICES—Strong 1 Year Plants—15c each, 95c per 10, \$3.50 per 50, \$6.00 per 100

Cultivated BLUEBERRIES

Delicious—Profitable

PRICES—Strong 2 Year 12 to 18 in. Plants, 75c each, \$6.00 per 10

(Write for prices on larger quantities)

Cultivated Blueberries grow in large clusters, plump, tender, and practically seedless with the delightful tang of the wild fruit. In addition to bearing large crops, it is a nice bush to add attraction to a lawn or garden.

Blueberries require an acid soil which contains an abundance of peat moss or other partly decayed vegetable matter. If your soil is deficient in this material, a heavy application of peat, rotted sawdust, or other material should be made and worked into the top 6 inches of soil.

Plant 3 to 4 ft. apart in rows 6-8 ft. apart. Will produce satisfactorily for 50 years, or more. For proper pollination, plant two or more varieties. We recommend the following:

CABOT (Early)—Bush is rather low and spreading, seldom reaching a height exceeding 4 feet. One of the earliest varieties, a good producer, excellent flavor, and a good shipper. Fruit is large, firm, and attractive.

RANCOCAS (Mid-season)—Popular. Ripens about 2 weeks after Cabot. The bush is tall, vigorous, and productive. The fruit is large, light blue, firm, and attractive.

RUBEL (Late)—Tall well shaped bush, attractive appearance, excellent producer, good quality slightly tart berry.

GOOSEBERRIES

The Gooseberry is gaining in popularity every year. It has been found to be very profitable in the home market and grows readily in any good soil. The plants bear abundantly and require little care.

Prices of Extra Size Two Year Bushes: 25c each, \$2.00 per 10, \$18.00 per 100

DOWNING—A medium size whitish green gooseberry, of good quality. Strong, upright grower and quite prolific. Midseason.

RED JACKET—JOSSLYN—Light red, medium size, excellent quality. Vigorous upright grower, healthy and productive. Early.

CURRANTS

PRICES—Extra strong 2 year bushes, 20c each, \$1.75 per 10, \$12.00 per 100

Write us for Special Prices on Large Quantities

WILDER—An unsurpassed commercial sort. Bunches and berries very large, bright attractive red. Hang on bushes well and of excellent quality. Productive.

129 So. Seneca St.

Weedsport, N. Y.
June 4, 1940

Kelly Brothers Nurseries,
Dansville, N. Y.

Gentlemen:

Your bundle of trees and bushes arrived in splendid condition. In all of 40 years I have purchased trees and shrubs, I think these were the best.

Yours very truly,
G. G. WHITMAN

WHY BUY STRAWBERRIES? GROW YOUR OWN FRUIT

PRICES—25 plants 50c, 50 plants 75c, 100 plants \$1.00, 500 plants \$4.50, 1000 plants \$8.00

All Strawberries sent Postpaid

DORSETT—An extra early self-pollenizing offspring of Premier. Does well on poor soil. Berries large, evenly matured, light bright red. Excellent for market or home use.

FAIRFAX—Another excellent new variety, ripening early, about the same time as Premier. Very vigorous and a fine plant maker.

PREMIER—An early, productive variety of unsurpassed quality. Vigorous and healthy.

CATSKILL—Plants large, very vigorous, yield very heavy crops. Berries very large, slightly irregular in shape, moderately firm, dark red, but glossy and attractive, mild subacid and good quality. Ripens in Midseason.

Fairfax Strawberry

EVERBEARING VARIETIES

PRICES—25 for 75c, 50 for \$1.25, 100 for \$2.00, 1000 for \$12.00

GEM—Very hardy, plants freely. Berry is dark red, large, sweetish tart flavor. Plants medium in size and immune to disease.

MASTODON—Without question the finest of the Fall or Everbearing varieties. It produces an immense crop in June and an abundant crop in the fall. Most prolific of all the Fall varieties. Berries immense size, unusually good quality and color.

PLANT KELLY'S BEARING AGE TREES THIS FALL... for early production . . . quick shade . . . most satisfactory results.

The bearing age trees we offer have been scientifically grown for three and four years. They have had the necessary root pruning to produce an abundance of fibrous roots . . . which insures successful transplanting.

These are not neglected overgrown trees usually offered as bearing age trees! They are fine, carefully grown, True-to-Name Kelly trees . . . guaranteed to satisfy you!

Fall is the best time to plant trees of this size, so they will become established for early growth next season.

Varieties we offer in bearing age trees:

APPLES—Baldwin, Cortland, McIntosh, Northern Spy, Red Delicious, Rome Beauty, R. I. Greening. 3 yr. 7-8 ft. trees, $\frac{7}{8}$ and up: \$1.25 each; 10 for \$10.00.

PEARS—Bartlett, Clapps Favorite, Duchess, Kieffer, Sheldon. 3 yr. 7-8 ft. trees, $\frac{7}{8}$ and up: \$1.25 each; 10 for \$10.00.

For additional varieties and more complete descriptions, kindly refer to our General Spring catalog.

February 15, 1939

Kelly Brothers Nurseries,
Dansville, New York.
Gentlemen:

Attached hereto you will find my annual order for fruit trees, together with check in amount of \$18.00. I know they will be up to the standard of all the trees I have been receiving from you for the past 22 years. Please have these trees delivered on or about April 15, 1939.

Yours very truly,
JOHN T. McCALL

March 11, 1940
I got a lot of very fine trees from you about 1928, all true to name and now bearing some fancy fruit.
Yours very truly,
A. M. BELL,
Oakdale, Pa.

Appleton, N. Y.
Feb. 20, 1940
I was very highly pleased with my order from you last year and especially with the delivery direct to the farm thus eliminating a week's delay by Freight.

HARDY FLOWERING SHRUBS FOR ALL SEASON'S BLOOM

PRICE (Except as Noted)

Strong Two Year Bushes, 2½ to 3 ft.,
35c each, \$3.00 per 10

ALMOND (Prunus Glandulosa)—A beautiful erect growing shrub reaching a height of 4 to 5 feet. Very attractive in May with its dainty double pink blossoms, which cover the branches in a cloud of bloom.

ALTHEAS, DOUBLE—Bloom freely from mid-summer until frost. We offer double flowering varieties in Purple, Red, White and Pink.

BEAUTY BUSH—Beautiful bell shaped pale pink flowers during June in great profusion. Price: 2½ to 3 ft., 50c each, \$4.50 per 10.

BUTTERFLY BUSH—Beautiful lilac colored flowers from June to frost.

DEUTZIA, GRACILIS—Dwarf growing. White flowers in June. Price: 18 to 24 in., 50c each, \$4.50 per 10.

DEUTZIA, PRIDE OF ROCHESTER—Double white flowers tinged with rose in May.

FORSYTHIA (Golden Bell)—Branches are literally covered in early spring with golden bell shaped flowers. The finest early blooming shrub. 6 feet.

HONEYSUCKLE, TARTARIAN—In May and June it is covered with charming pink flowers, followed by clusters of red berries. Attains a height of 8 feet.

HYDRANGEA ARBORESCENS (Hills of Snow)—A very beautiful and showy shrub. Ball shaped clusters of pure white flowers from July to September.

HYDRANGEA P. G.—Immense cone shaped clusters of pink and white flowers turning to bronze in autumn. Price: 2½ to 3 ft., 50c each, \$4.50 per 10.

HYDRANGEA, TREE FORM—The hydrangea P. G. grown in tree form with a single stem. Price: 4 to 5 ft., 75c each, \$7.00 per 10.

INDIAN CURRANT (Coralberry or Red Snowberry)—Rose colored blossoms in June and July followed by dull red coral colored berries.

JAPAN QUINCE—Completely covered with dazzling scarlet flowers in May. 18 to 24 in.

SPIRAEA ANTHONY WATERER—Dwarf growing. Deep pink blossoms late in June. 18 to 24 in.

SPIRAEA THUNBERGI—A graceful shrub with bright green, fine feathery foliage which turns orange scarlet in the fall. Blooms in late April with abundant white flowers that almost cover the branches.

SPIRAEA VAN HOUTTEI (Bridal Wreath)—Most popular flowering shrub. Suitable for hedge or specimen planting. White flowers in clusters during May and June. Price: 3 to 4 ft., 20c each, \$1.50 per 10, \$10.00 per 100.

SNOWBERRY—Waxy milk white berries which remain all Winter.

SNOWBALL—Globular clusters of white flowers in late May.

RED LEAVED BARBERRY—Beautiful, warm, bronzy red foliage from Spring until Winter. Abundant scarlet berries throughout the Winter.

WEIGELIA CANDIDA—Pure white flowers from June to Fall.

WEIGELIA EVA RATHKE—Deep scarlet blossoms in June and intermittently all Summer.

WEIGELIA ROSEA—Dwarf. Green leaves broadly margined with creamy white. Pink flowers.

Vines

AMPELOPSIS VEITCHI (Boston Ivy)—Bright green foliage. Clings tightly to smoothest surface. 40c each.

BITTERSWEET—Glossy foliage, creamy white flowers, large clusters orange and crimson berries retained all winter. 50c each.

CLEMATIS JACKMANNI—Very large, single purple blossoms. 75c each.

CLEMATIS PANICULATA—Fragrant, pure white blossoms in September. 40c each.

DUTCHMAN'S PIPE (Birthwort)—Large, heart-shaped leaves and quaint pipe-shaped green flowers. 75c each.

HALL'S JAPAN HONEYSUCKLE—White flowers from July until winter. 30c each.

PURPLE WISTERIA—Pale lilac flowers in abundance in May. Grafted plants sure to bloom. 75c each.

SILVER LACE VINE—Quick growing thrifty climbing vine. Covered with white, silvery blossoms from early August until fall. 50c each.

ORNAMENTAL HEDGES

BEAUTIFY AND PROTECT YOUR GROUNDS

BARBERRY THUNBERGI **The Best All Purpose Hedge**

A shrub of marked excellence because of its bright green foliage which changes to brilliant colors in the Fall, and its bright scarlet berries which are very conspicuous throughout the Winter. Their habit is dwarf and regular spreading. Grows well in the shade and extensively used in landscape work. It is very hardy and has never been known to Winterkill. It bears and shears well and makes a dense hedge.

12 to 18 inches high, **10c each, 95c per 10, \$8.00 per 100**

18 to 24 inches high, **15c each, \$1.25 per 10, \$10.00 per 100**

CALIFORNIA PRIVET—Best trimmed hedge 3 to 5 ft. high. Set in single row 10 inches apart. If broad hedge is desired plant in double rows—rows 1 foot apart and bushes 1 foot apart in each row, but staggered so as to come 6 inches apart in hedge. Strong bushes, 2 to 3 ft. high **\$1.00 per 10, \$4.00 per 100.** Extra strong bushes, 3 to 4 ft. high, **\$1.25 per 10, \$6.00 per 100.**

AMoor RIVER PRIVET—A hardy vigorous grower recommended for sections too cold for California Privet. Strong bushes, 18 to 24 in., **10c each, \$1.00 per 10, \$6.00 per 100.**
